Table 1

Severity Level	Fault description
Priority 1 (Total Outage)	For incidents where the issue has existed for five minutes or more before incident logging and is limited to the following:- Total loss of a Wholesale Ethernet Service (which is defined as no transmission of signals in one or both directions); or Available throughput <10% of predicted Service Bandwidth; or Latency is > 100ms; or Packet loss is greater than 5%
Priority 2 (Severe Intermittence)	Intermittent connectivity of single spoke Site that has high degree of Wholesale Ethernet Service impact - Where the intermittence can be demonstrated repeatedly within an hour interval
Priority 3 (Degradation)	Intermittent connectivity of single spoke Site that has low Wholesale Ethernet Service impact - Where the intermittence cannot be demonstrated repeatedly within an hour interval Bandwidth throughput or other material quality of Wholesale Ethernet Service issues
Priority 4 (Query)	End User application performance issues across a particular Wholesale Ethernet Service.

1.3 Incident Resolution Targets

(a) CORETX whilst working with the Provider shall use reasonable endeavours to resolve incidents within the timescales set out in Table 2.

Table 2

Severity	Issue resolution target, measured in Clock
	EFM based Wholesale Ethernet Service
Priority 1	6
Priority 2	12
Priority 3	24

Priority 4	48
------------	----

- (b) It may be necessary to extend the timescales in Table 2 due to the complexity of an incident or where the Provider is dependent on a third party of the Provider for resolution of the incident.
