

Colocation Services

CORETX is a leading UK based colocation provider, offering businesses access to over 100 UK data centres, and more than 300 globally. In these data centres CORETX can offer a range of colocation options including; cages, suites, full, half and quarter racks.

CORETX's core data centres are connected to our 1-100Gb capable private network as we recognise that high speed connectivity is as essential as a secure and reliable colocation service.

In our network of data centres we're able to offer a range of other services including dedicated servers, virtual private servers, interconnects, leased lines, data backup, data storage, and data centre migration, to name just a few.

Choosing CORETX as your colocation provider comes with all the benefits you'd expect:

High Speed Connectivity

Unsurprisingly, CORETX biggest strength is our private, high-capacity network, offering high speed connectivity direct to your business premises and/ or data centre. Our customers are backed by our 1-100Gb capable core network and direct connections to 100s of ISPs, providing high quality and reliable connections for your colocation service.

Network Resiliency

CORETX appreciates that maximum uptime is imperative for any company. That's why CORETX utilises multiple 10Gbit connections, with automatic failover protocols protecting your circuits.

Support

We know our customers need round-the-clock support. With CORETX you will always get through to a person who will help with your enquiry, whatever the time of day. We also provide our customers with direct access to our Network Operations Centre, where you can log a support ticket and receive network updates.

Total Security

CORETX offers both high performance storage and off-site backup services, utilising our network to provide fast and hassle free resilient solutions which can be tailored to our customers' requirements. To cover the physical security, CORETX only uses facilities which have 24/7 CCTV coverage, and security personnel on-site.

Location

With colocation facilities across the UK and globally, you can be assured that we can provide alternative locations if required. CORETX's wide range of locations ensures that our customers can find facilities to match their specifications.

Price

Obviously, price is an extremely important factor when making business decisions. CORETX's wide range of locations, coupled with the numerous options amongst each of our services enables our customers to choose a service which matches all of their requirements, including price.

Data Centre Classification

CORETX has data centre facilities ranging from Tier 1 to Tier 4, which represent the different levels of resilience they provide. The majority of our data centres are Tiers 2 and 3 and feature failover systems across power, cooling and connectivity as a minimum. With such a wide range of data centres you can be sure to find a facility that is geographically diverse from your office.

Tier I: Basic Site Infrastructure

- ✓ Minimal or no redundancy
- ✓ Power and cooling provided via a single path
- ✓ Planned and unplanned outages will have a negative impact on equipment
- ✓ Generally provide 99.67% availability

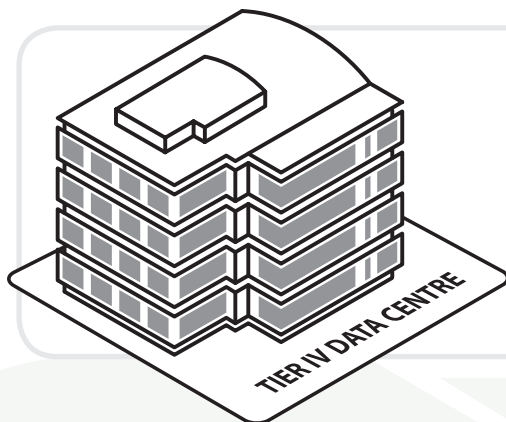

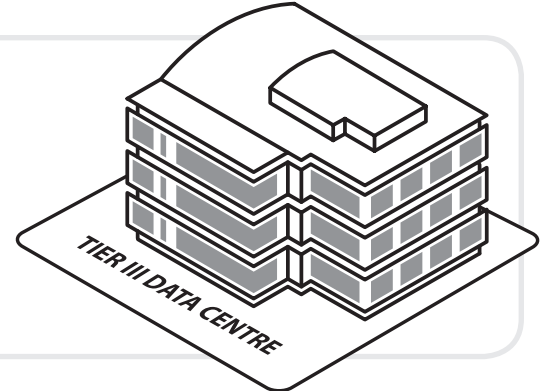

Tier II Redundant Site Infrastructure

- ✓ Has redundant components (n +1) but power and/or cooling through a single path
- ✓ Allows some components to be taken off-line for service on a planned basis with no disruption
- ✓ Unplanned outage to such systems, may have a negative impact
- ✓ Typically provide 99.75% availability

Tier III: Concurrently Maintainable Site

- ✓ Multiple independent power and cooling paths, providing greater redundancy and reliability
- ✓ Risk of downtime drops substantially
- ✓ Routine maintenance and most unplanned outages will have no negative impact

Tier IV: Fault Tolerant Site

- ✓ The ultimate in fault tolerance and reliability
- ✓ Offering multiple redundancies for each piece of equipment
- ✓ Any single outage or failure of any component or distribution path has no negative impact
- ✓ The most redundant and highly-available data centres
- ✓ Have been shown to provide 99.99% availability
