

## CORETX Professional Services

Delivering business goals through technology

Computing and communication is essential to productivity, efficiency and competitiveness. To be successful, effectiveness delivered must always meet requirements. To reach higher and take new opportunities, the whole platform must be created with the future in mind.

### Customer Challenge

We understand how important it is to synchronise your business goals with your systems architecture. When the two complement each other, overall efficiency and productivity gains are achieved more quickly and last much longer.

### CORETX Professional Services

Our professional services team provides a complete set of project and consulting services, tuned to your requirements and circumstances. With a track record of successful project delivery, we can tackle virtually any type and size of change with confidence and competence.

### How it Works

Our dedicated solution architects have the expertise to address and advise on long term, high level business objectives. For shorter and simpler assignments, we can provide qualified and certified consultants to work on-site or remotely to complete pre-specified tasks in all areas of the infrastructure environment.

Any new or complex enterprise solution carries a degree of risk. Our experts are there to manage as well as map out your steps to success. We can ensure trouble-free implementation and minimal disruption to your business, helping manage entire projects from initial concept, through design, deployment and delivery.

Our in-house project management team comprises highly experienced individuals accredited to Prince2 or equivalent, all managed and coordinated within a centralised Project Management Organisation.

Match business goals with systems architecture

Complete IT consulting service

Wide range of project types

Successful track record

CORETX has over 150 field-based engineers, as well as a team of project management staff. Coordinated by an office-based allocation team, and supported by our large UK-based service desk, this resource collectively delivers our solutions across the country.

Our field engineers are highly skilled in supporting a wide range of IT devices, software packages and operating systems. CORETX has strategic partnerships with the world's most respected solutions and services vendors. We achieve the highest level of accreditations and retain the highest quality expertise within our workforce.

## REACH HIGHER

CORETX offers a large portfolio of IT services, all expertly delivered by highly skilled staff, and backed up with strong data centre capabilities and our own data network.

To help your business REACH HIGHER, we often recommend managing the solutions CORETX Professional Services design and deliver with carefully selected CORETX Managed Services.

Through the combination of CORETX professional services and managed services, your IT platform will be designed, managed and developed over the long term to reach levels of excellence hard to attain internally.
